

The **Asbestos-related disease and Mesothelioma Biology Research (AMBR) project** team at Flinders University, led by Prof. Sonja Klebe, is seeking adult participants to help provide valuable health information and biological samples for research on mesothelioma and asbestos-related diseases aimed at improving survival outcomes of those people affected by asbestos exposure.

If you are interested in participating and are...

- Aged 18 years or older and either;
- Have an existing diagnosis, or a suspicion on clinical grounds, of mesothelioma or asbestos-related disease
- A relative of a person with a diagnosis of mesothelioma or asbestos-related disease
- A work colleague or household member of a person with a diagnosis of mesothelioma or asbestos-related disease
- Have a known asbestos exposure

... Please contact us!

Southern Adelaide Clinical Human Research Ethics Committee Approval number: 2023/HRE00312

What does participation involve?

If you consent to participate, at minimum there is nothing you need to do! We will collect:

Your relevant health information from medical records

Donation of your tissue samples left-over after diagnostic testing (if available)

You may also choose to consent to one or more of these activities:

Donation of a blood sample [not compulsory]

Donation of a stool (faeces) sample [not compulsory]

Complete a health questionnaire [not compulsory]

Benefits of participating

- There will be no direct benefit to you from taking part in this research, nor will you be paid, but it may help other people with mesothelioma or asbestos-related disease in the future.
- Results of this research cannot be directly used to assist your medical treatment or find out your genetic risk-factors.
- There are no costs associated with participating in this research, nor will you be paid.
